Technologies and Languages

- **Languages**: JavaScript, Python, Java, C++, TypeScript, PHP.
- **Frontend:** React, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Next.js, Angular.
- **Backend:** Node.js, Express.js, Django, Flask, ASP.NET, Socket.IO, JWT.
- **Databases & Cloud:** MongoDB, Mongoose, MySQL, SQLite, Firebase, AWS, Cloudinary.
- **Tools:** Linux, Javafx, React Testing Library, Git, GitHub, Postman, Vite, Render, Vercel, Hugging face.
- **Concepts:** DSA, SDLC, Agile, CI/CD, Object-Oriented Programming, AI-assisted Development.

Work Experience

Software Developer Intern — **Gethu games (startup)**, Chennai, India — **Feb 2025 – Mar 2025**

- **Built** a social platform for NGOs where volunteering and donations happen magically.
- **Contributed** to the development and maintenance of the **Grassroots App admin panel**
- **Integrated** frontend components with backend services and supported debugging and data operations across **MERN stack modules**.

Technologies:- React.js, JavaScript, Node.js, Express.js, MongoDB, Firebase

Projects

- **DGVC Connect | React, Node.js, JWT, MongoDB, Socket.IO, Cloudinary, Tailwind CSS, DaisyUI, REST API**
  - **Built** a marketplace platform enabling college students to buy, sell, and share academic resources by implementing secure authentication with **unique college ID verification** and **JWT**-based authorization.
  - **Reduced** average image size by **55%** by implementing automated image compression and responsive image resizing using **Sharp.js**.
  - **Enabled** real-time buyer–seller communication by integrating **Socket.IO** for instant communication.
  - **GitHub**: github.com/Rohinth-Thinker/connect | **Live**: connect-qfcj.onrender.com
- **CssBro | 2nd Place – National-level Hackathon | Chrome Extension, React, TypeScript, HTML, CSS**
  - **Built** a browser extension for live CSS editing, DOM inspection, and CSS generation.
  - **Reduced** manual CSS debugging by enabling instant visual style updates without modifying source files using the Chrome Extension API.
  - **GitHub**: https://github.com/Rohinth-Thinker/cssBro
- **CLI Image Optimization Tool | Node.js, Yargs.js, Sharp.js, Firebase, GIT**
  - **Built** a **Node.js CLI** tool to automate responsive image optimization by generating optimized 640px, 1920px, and 2560px image variants from a single input.
  - **Reduced** average image size by **68%** through automated image compression while maintaining visual quality using **Sharp.js**.
  - Integrated **Firebase** Storage to automatically upload processed images and generate public URLs.
  - **GitHub**: github.com/Rohinth-Thinker/auto-image-automation-tool
- **AI Website Generator | Python, LangChain, Gemini API, Gradio**
  - **Built** an AI-powered web application that generates complete HTML, CSS, and JavaScript webpages from natural language prompts.

- **Enabled** real-time preview of AI-generated webpages within a sandboxed iframe using Base64 encoding.
- **Integrated** LangChain with Google's Gemini API to orchestrate prompt processing and dynamic code generation.
- **Live**: https://huggingface.co/spaces/OUR-AI-WORLD/AI-CODE-GENERATOR

Achievements

- **Secured 2nd Place – National Level Hackathon (FOSS Hack 2025)**
  - As part of a four-member team, developed a browser extension that reveals HTML elements and their CSS properties on hover for any website.
  - **Project**: https://github.com/DevCafeInn/cssBro
  - **Results**: https://forum.fossunited.org/t/foss-hack-2025-results/5541/6
- **Secured 2nd Place – 24-Hour Intercollegiate Hackathon (HACKFORGE 2025)**
  - Secured 2nd place as part of a 3-member team in a 24-hour hackathon at D.G. Vaishnav College.
  - Developed “G-Card”, a QR-based digital gifting platform enabling secure money transfers with personalized messaging and expiry control .
  - Built an Intelligent Ambulance Routing System using Dijkstra’s Algorithm and YOLOv8 for real-time traffic optimization and smart signal prioritization.

Education

- **B.S.C Computer Science,** D.G. Vaishnav college (Autonomous), Madras University. **2023–2026**
  - **CGPA - 8.07 / 10.00**
  - Active member of the department forum, organized and coordinated multiple college events
  - Presented a paper on **VL-JEPA (Video Joint Embedding Predictive Architecture)**, explaining its advancements and real-world AI applications.
  - **Secured 1st place** in the **Web Designing Event** at the Computer Science Orientation Program.
