github.com/Rohinth-Thinker

Software Engineer | Full Stack Developer (MERN)

I build scalable web apps with real-time features using React, Node.js, and MongoDB.
Strong in problem solving and data structures.

Technologies and Languages

- **Languages**: JavaScript, Python, Java, C++.
- **Technologies**: React, Redux ToolKit, Node.js, Express.js, Flask, Socket.IO, JWT, Tailwind CSS, Daisy UI, HTML, Figma.
- **Database:** MongoDB, Mongoose JS, Firebase, AWS, SQLite, MySQL, Cloudinary.
- **Other**: Data Structures and Algorithms, Problem Solver, Content Researcher, Video Creator, Event Organizer.

Projects

- **DGVC Connect | React, Node.js, MongoDB, Socket.IO, Tailwind CSS, DaisyUI**
  - GitHub: github.com/Rohinth-Thinker/connect | Live: connect-qfcj.onrender.com
  - Built a college-exclusive marketplace for buying and selling academic resources.
  - Implemented secure authentication with ID card-based verification and **JWT**.
  - Developed real-time messaging between buyers and sellers using **Socket.IO**.
  - Designed a classroom-style file management system for structured resource sharing.
  - Integrated item listing, search/filter, and **Cloudinary**-based media storage.
- **CLI Image Optimization Tool | Node.js, Sharp.js, Firebase**
  - GitHub: github.com/Rohinth-Thinker/auto-image-automation-tool
  - Built a CLI tool to automate image optimization for multiple device resolutions.
  - Integrated **Firebase** for storage and generated public URLs for access.
  - Enhanced usability with **Yargs.js** for flexible command-line interactions.
- **Instagram Clone | React, Node.js, MongoDB, Socket.IO**
  - GitHub: github.com/Rohinth-Thinker/july_msg_app | Live: july-msg.onrender.com
  - Developed a full-stack web application replicating Instagram's functionality.
  - Implemented core features including authentication, real-time messaging, post creation, and user interactions.
  - Efficient file handling with **Multer and GridFS** and Integrated **AWS S3** for image storage and management.
- **Poll App | React, Node.js, MongoDB, Socket.IO**
  - GitHub: github.com/Rohinth-Thinker/poll-app | Live: poll-app-jp9w.onrender.com
  - Built a polling platform with user authentication and poll management
  - Implemented real-time voting updates using **Socket.IO.**
  - Integrated **JWT**-based authentication for secure multi-user access.
  - Managed complex state efficiently using **Redux Toolkit.**

Achievements

- **Secured 2nd Place – National Level Hackathon (FOSS Hack 2025)**
  - As part of a four-member team, developed a browser extension that reveals HTML elements and their CSS properties on hover for any website.
  - Project link - https://github.com/DevCafeInn/cssBro
  - Hackathon results page - https://forum.fossunited.org/t/foss-hack-2025-results/5541/6 (Project name - cssBro, Team name - Team 418).

- **Secured 2nd Place – 24-Hour Intercollegiate Hackathon (HACKFORGE 2025)**
    - Secured 2nd place as part of a 3-member team in a 24-hour hackathon at D.G. Vaishnav College
    - Developed “G-Card”, a QR-based digital gifting platform enabling secure money transfers with personalized messaging and expiry control
    - Built an Intelligent Ambulance Routing System using Dijkstra’s Algorithm and YOLOv8 for real-time traffic optimization and smart signal prioritization

Education and Certifications

- **B.S.C Computer Science,** D.G. Vaishnav college (Autonomous), Madras University. **2023–2026**
    - Active member of the department forum, organized and coordinated multiple college events
    - Presented a paper on emerging AI technologies (**VL-JEPA**), explaining advancements and real-world applications
    - **Secured 1st place** in Web Designing Event at the Computer Science Orientation Program
